

Chemistry and Food: Safety, Authenticity, and Other Challenges

TIME AND DATE

June 2, 2023 | 11:00am - 12:30pm ET

ABOUT

Chemists are creating new innovations in food technology to tackle complex challenges in the industry. While these innovations have become more commonplace, regulation and testing technologies have not kept pace. This virtual webinar, hosted by the Chemical Sciences Roundtable, will examine the current landscape of synthetic food and cellular agriculture and explore how the chemical sciences can provide insights into the modern food industry.
